

# HENK

BOVEDA® humidifiers maintain the optimum air humidity for approx. 2 months and can be bought throughout the world. The corpus of the humidor is made of solid Spanish cedar, thus providing a unique aroma inside. In case you don't need your humidor while you're travelling, you can also take it out and leave it in your hotel or office as a stand-alone device. We were able to benefit from the services of currently the best humidor constructor in the world, Marc André, for the design of the humidor.
